TUF BOARD® PVC TRIMBOARDS & SHEETS

TUF Board® cellular PVC gives your building projects low-maintenance trim, architect design and landscape components. TUF Board® will not swell, rot, crack, split or delaminate like wood. It is lightweight, moisture resistant, resistant to insects and many chemicals, and less susceptible to warp. TUF Board® can be cut, machined, nailed, glued, and screwed just like wood. It is fire retardant (UL-94 VO 5V, HB), and has much better machining qualities than those of wood. TUF Board® is also paintable.
